

CONTENTS

Numerical Study of Oil Flow in Tee Junction with Leaks

Morgana de Vasconcellos Araújo, Flávia Daylane Tavares de Luna, Enivaldo Santos Barbosa, Severino Rodrigues de Farias Neto, Antonio Gilson Barbosa de Lima (1)

A Comparative Experimental Study of Sweep Efficiency in Naturally Fractured Reservoirs

James J. Sheng, Faizan Nasir (12)

Enhance Plugging Performance of Microgel by Introducing Cationic Group

LI Guanghui, ZHANG Guicai (19)

Research on BHA Load Transfer Considering Drill String Transverse Vibration

YAN Tie, WANG Peng, Zhang Qian (23)

Evaluation of the Physical-Chemical Properties in Petroleum Coke

Semaghiul Birghila, Ionela Carazeanu Popovici (28)

Present Situation Research on Axial Flow Displacement Theory During Cementing

AI Chi, Yu Fahao, FENG Fuping, CHEN Dingfeng, WEI Ting (32)

The Study of Rock Body Damage Constitutive Model on Refracturing

WANG Tingting, WANG Chen, ZHANG Jingbo, ZHAO Wanchun, CAI Meng (38)

The Methods to Determine Oil-Bearing Area in Different Types of Reservoirs of Jilin Oilfield

LIU Jiyu, GU Chao, XUE Ming, WANG Zenghan (41)

The Analytic Hierarchy Process for the Reservoir Evaluation in Chaoyanggou Oilfield

LIU Bin (46)

The Flow Unit Division in the No.1 Fault Block of Pubei Oilfield

LIU Jiyu, SHAO Shuai, ZHAO Jiahong, WANG Tianxu (51)

Efficiency Criterion of Corrosion Inhibitors of Carbon Steel in Seawater

K. Habib (56)

Research of Improving Super Heavy Oil Properties Through Flue Gas

LI Bin (60)

Development of High Efficient Anti-sloughing Drilling Fluid and Its Application in Chunhua Block

LIU Yunpeng (65)
